

Plus Housing Group Plus Dane Rewires 2012

Overview

The Frank Rogers electrical team was appointed to carry out 50 rewires at Plus Dane homes across the Runcorn area.

With strict deadlines of three days to complete works for each property, managing works and timescales formed a key part of the programme which was carried out over 18 weeks.

A full time Tenant Liaison Officer was appointed to monitor progress and tenant satisfaction. Once the project was completed and handed over tenant satisfaction levels stood at 97%

Dean Rogers, Managing Director of Frank Rogers said:

"As with any scheme where our team are working in people's homes, their attitude, consideration and professionalism are critical. It's fantastic to see that once again, Frank Rogers staff have received such high satisfaction levels from tenants and shows that our people are upholding the firms values and beliefs."
