Overview

A full roof replacement programme was successfully completed within a six week timeframe at a block of flats in Warrington.

A straight forward roofing project, the team stripped the roof and applied temporary coverings followed by a full replacement programme, ensuring the building was watertight and handed over in line with project timescales.

The site team has been praised for their work at the property and tenant satisfaction feedback forms have been exceptionally positive.

Mike Travis, Contracts Manager at Frank Rogers said:

"This project typifies the solid processes that we have in place. We use the same approach regardless of scale and size at every contract that we're involved in and ensure the highest levels of customer service and workmanship are applied."
