

Riverside Housing Group Fire Upgrades to Electrical Storage Areas

Overview

Frank Rogers was appointed by Riverside Housing to manage fire improvements works at a number of houses of multiple occupancy throughout Wirral, Runcorn and Liverpool.

Over 300 homes, each containing electrical cupboards within central communal areas, were in need of a series of fire improvements and upgrade works to ensure that they are fully compliant with fire regulations.

Existing frames, doors and panelling were removed and units built using fire resistant materials over a contract period of 6 months.
