

## Greenbank College

Greenbank College New Build Classroom Block & Refurbishment, Liverpool

### OVERVIEW

Frank Rogers achieve practical completion on latest education new build including major modernisation creating new classrooms and circulation space at Greenbank College.

### WORKS DESCRIPTION

Working with client consultants we completed a space planning exercise resulting in the demolition and relocation of internal dividing walls forming new classrooms and circulation space. Additional classroom capacity was added through a new build extension connected to the main school via a new glass link corridor.

### OVERCOMING CHALLENGES

Early mobilisation was critical to achieving success, agreeing health and safety principles within our Construction Phase Plan permitting our team time to establish a compound in advance of works.

We implemented strict site logistics maintaining timely material deliveries, waste collection and parking for contractor vehicles, minimising daily impact upon the school.

Prior to commencing demolition works we supported consultant engineers undertake intrusive investigations developing necessary precautions prior to starting.

Our Contracts Manager maintained daily communication with the project team including school CEO Mary Beaumont and supporting consultants ensuring no concerns left unresolved.

### CUSTOMER SATISFACTION & TESTIMONY

Contracts Manager, Dave Linderman overseen the project from conception to completion building positive client relationships providing assurance through weekly progress reports we remained on track.

Mary Beaumont CEO of Greenbank College, commented

*"The Frank Rogers team kept us well informed of progress throughout the works. They were highly responsive to any queries that arose and offered quick solutions for any issues we had. The project was completed on time, to budget and to a very high standard. We will have no hesitation in recommending Frank Rogers to any future clients".*
